Languages

Hebrew | English

Skilled Frontend Developer with 4+ years of experience specializing in user-focused, enterprise-grade web applications. Expert in Modern **Angular** (v19) and **TypeScript**, with professional experience in **React**.

Strong focus on building scalable architecture using Signals, NX Monorepos, and RxJS. Experienced in optimizing development workflows through AI-driven tools (Cursor) and collaborating across multi-disciplinary teams.

Technical Skills

- Frameworks: Angular (Latest versions), React, NGXS, RxJS.
- Architecture: NX Monorepos, Signals, OnPush Strategy, Component-driven design.
- Languages & Tools: TypeScript, JavaScript, SASS, HTML5, REST APIs.
- AI & Productivity: Cursor AI, Prompt Engineering, AI-assisted development.

Experience

Frontend Developer

Kramer

2022-2026

- Part of the original team tasked with building Kramer's first modern SaaS platform from scratch, moving the company away from older hardware-focused software toward a cloud-first approach.
- Built and owned several core features end-to-end for enterprise platforms used by organizations like NYU and American Airlines, handling everything from the initial UI in Angular to backend API integration.
- Wrote clean, type-safe code using the latest Angular features (v19+, Signals) and RxJS within an Nx monorepo to ensure the brand-new codebase stayed organized and scalable.
- Contributed to a shared UI library used across the group, helping the team build new features faster while maintaining a consistent look and feel.
- Participated in team planning and code reviews, helping the group maintain high coding standards and best practices for a project with zero legacy code.

Web developer, marketing and data analysis

Freelance

2021-2022

Developed responsive web applications and marketing platforms using modern frontend technologies.

Head of Digital Marketing & Data Analyst

Blanco Advertising
